# Find the Medicaid Formulary on Epocrates

Epocrates is a free mobile medical reference application prescribing physicians can use at the point of care to review the Medicaid formulary and preferred drug list. Epocrates provides instant access through the internet or a handheld device.

Once registered, users can select the “**Texas Medicaid**” formulary option, allowing searches by drug name to determine which products are preferred, non-preferred, or subject to clinical prior authorization criteria. Epocrates does not mirror the HHSC designations differentiated by dosage form. In these situations, Epocrates accompanies the designation with an explanatory message.

For more information, visit [txvendordrug.com](http://txvendordrug.com) search the keyword “*Epocrates*.”

Download the application for free at [epocrates.com](http://epocrates.com).
